To whom it may concern

We, Ms V.K. Patel & Co., would like to express our utmost satisfaction and appreciation for the exceptional performance of *MULTIFOAM PRO 5145 construction Pu foam Imported and supplied by Ms Milestone (India) Corp, Mumbai. We had the opportunity to witness the incredible durability and strength of this product in various projects we undertook in last fifteen years. Specially during the installation of door frames in the Pinnacle Crest building, constructed by Baashyaam Construction in Chennai, India.

In the year 2016, the region was struck by the devastating cyclone Vardha, which brought forth extremely high wind velocities reaching up to 150 kmph. This powerful force posed a significant challenge for the building's structural integrity, particularly for the installed door frames. However, we were amazed to observe that despite the relentless battering, the door frames supported by Multifoam Pro successfully withstood the havoc caused by the cyclone.

What impressed us the most was the fact that MULTIFOAM PRO accomplished this feat without the need for any mechanical fasteners. The frames remained firmly in place, exhibiting remarkable resistance to the powerful forces of nature. Although a few doors experienced some damage due to heavy banging, the frames themselves remained intact, showcasing the incredible strength and reliability of the MULTIFOAM PRO product.

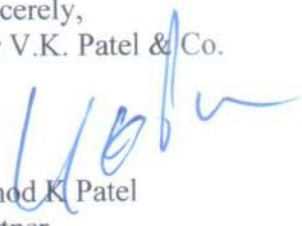

The successful performance of MULTIFOAM PRO in such adverse conditions is a testament to its exceptional quality and engineering. Milestone (India) Corp, Mumbai, deserves commendation for providing us with a product that surpassed our expectations and delivered outstanding results.

We would like to extend our gratitude to Milestone (India) Corp for their professionalism and expertise throughout the project. Their guidance and support ensured that the installation of the door frames was executed flawlessly, even in the face of extreme weather conditions.

In conclusion, we make use MULTIFOAM PRO in every project we do insulation with and wholeheartedly recommend MULTIFOAM PRO, to any construction project that demands resilience, durability, and exceptional performance. Their products and expertise have undoubtedly proven their worth in challenging circumstances, and we are confident that they will continue to do so in the future.

Thank you once again for the outstanding product and service.

Sincerely,
For V.K. Patel & Co.

Vinod K. Patel
